Specialized Connector - Designed for compatibility with Scott Young Research's "Changer Handle," the HeRO Double-Lock Mop offers a significant price savings in comparison to SYR offerings.

Scrub Pad - Constructed from a coarse fiber mesh. Scrub pads, also known as scouring pads, are designed to power through tough grease and grime. Manufactured with a scrub pad, the HeRO Double-Lock Mop enables staff to remove stubborn floor stains and shoe scuffs on baseboards.

Loop-Ended & Bartacked - The HeRO Double-Lock Mop features a loop-ended design. This comprises of a single yarn strand being continuously looped throughout the entire length of the mop. This characteristic greatly improves the durability and launderability of the mop verses a "cut-end" design. Furthermore, the mop is tailbanded by a half inch band of polyester that prevents bunching and increases floor coverage.
