100% Recycled - The HeRO Recycled Saddle Mop is the workhorse of the janitorial industry. Designed with 100% recycled materials originating from post-consumer soda bottles and post-industrial cotton, this mop is designed for commercial use and repeated laundering.

Scrub Pad - Constructed from a coarse fiber mesh, scrub pads, also known as scouring pads, are designed to power through tough grease and grime. Manufactured with a scrub pad, the HeRO Recycled Saddle Mop enables staff to remove stubborn floor stains and shoe scuffs on baseboards.

Loop-Ended & Bartacked - The HeRO 100% Recycled Mop features a loop-ended design. This comprises of a single yarn strand being continuously looped throughout the entire length of the mop. This characteristic greatly improves the durability and launderability of the mop versus a “cut-end” design. Furthermore, the mop is tailbanded by a half-inch strip of polyester that prevents bunching and increases floor coverage.
